PROFESSIONAL SUMMARY

Data Analytics Engineer with expertise in designing large-scale ETL solutions and building data pipelines using tools like Fivetran, Snowflake, DBT, Python, SQL, and Shell scripting. Experienced in creating data-driven reports and dashboards with Python, SQL, Tableau, and Power BI, optimizing workflows, and automating processes to deliver actionable insights that drive business decisions and reduce costs. Strong background in both data engineering and analytics, with a focus on solving complex data challenges.

SKILLS

Programming Language and Libraries: Python, SQL, PySpark, Pandas, NumPy

Tools and Softwares: Snowflake, DBT (Data Build Tool), Fivetran, Matillion, Tableau, Power BI, MS Excel, CleverTap, Amplitude, API Integration

Soft Skills: Problem-Solving, Leadership, Ownership, Teamwork, Critical Thinking, Fast Learner, Time Management

PROFESSIONAL EXPERIENCE

Data Engineer II

03/2024 – Present

Accordion India (Formerly Merilytics), Hyderabad, India

- Led the design, development, and deployment of large-scale ETL solutions using **Fivetran, Snowflake, DBT, Python, SQL, and Shell Scripting** for world's second-largest telecom provider. Orchestrated the complete data ingestion process from various sources, constructing pipelines for comprehensive ingestion, **data modeling, and implementing logic for data modification**.
- Designed and implemented data warehouse solutions by normalizing source data, applying **SCD Type 1 and Type 2** to track historical changes, ensuring data consistency and availability for downstream users.
- Developed **CI/CD pipelines** and utilized **Git for version control & Rollback**, automating data pipeline deployments, reducing manual interventions, and ensuring faster, more reliable data processing and integration.
- Developed a **Python**-based procedure to automate daily data transfer from **Oracle to Snowflake**, incorporating automated notification alerts. The solution required no manual intervention and achieved a cost reduction of up to **50%**.

Data Analyst Intern

11/2023 – 03/2024

Jar, Bangalore, India

- Developed daily auto-tracking dashboards using **Python** and automated data push to Google Sheets using the **gspread** library, scheduled with **Cron**, to provide the sales team with real-time insights.
- Performed **A/B testing** and utilized **CleverTap** and **Amplitude** to enhance the bottom funnel of Insurance, resulting in a **6X** increase in target achievement and a **+4%** improvement in conversion rates.
- Analysed cohorts based on average monthly balance and user personas using **Pandas** and **NumPy** during the initial product push for Jar Plus (P2P), including control group comparisons, which contributed to closing the first week with an invested amount of **6 Lakhs** and achieving a **30%** return on investment in the subsequent weeks.

Machine Learning Intern

01/2023 – 07/2023

Yugasof Software Labs, Gurgaon, India

- Utilized **Elasticsearch** and the **KNN algorithm** to process data, analyse patterns, and improve data retrieval, which enhanced the chatbot's search performance and accuracy.
- Collaborated across teams to integrate a model developed using **Python, LABSE (based on BERT), Elasticsearch** into the **chatbot** product, enabling efficient search and response mechanisms.

EDUCATION

Bachelor of Technology in Computer Engineering

08/2019 – 06/2023

YMCA, Faridabad, Haryana (Result: 8.18 CGPA)

ACHIEVEMENTS

- Part of the team awarded **The Super Squad** by the VP(Accordion) for exceptional performance.
- Solved 400+ questions on various coding platforms. [Leetcode](#) | [GFG](#)
- Secured 98.16 percentile in JEE-Mains 2019

CERTIFICATIONS

- The Joy of Computing using Python - **IIT Madras**
- SQL Beginner to Advanced for Data Professionals - **Codebasics**
- DBT (Data Build Tool) Learn Fundamentals – **DBT Labs**
- Pandas By Kaggle – **Kaggle**
- Excel: Mother of Business Intelligence - **Codebasics**
